

Fahmi Hanafi

Jakarta Utara, DKI Jakarta | +62 85894079843 | fhanafii.my.id | linkedin.com/in/fahmi-hanafi

Final-year Informatics student with a strong interest in Android development and UI/UX design. Experienced in building mobile applications using Kotlin and modern Android technologies such as Jetpack Compose, MVVM architecture, and REST API integration. Passionate about creating user-friendly applications and continuously improving both technical and design skills.

Pendidikan

Universitas Pamulang — Teknik Informatika

2022 - Sekarang

GPA : 3.57/ 4.0

Pengalaman

Mobile Developer Cohort — Bangkit Academy 2024

Sep 2024 - Des 2024

- Completed intensive Android development program with focus on Kotlin and modern Android stack
- Built mobile application as part of capstone project in Product Track
- Learned best practices in mobile development, clean architecture, and collaboration
- Completed Dicoding learning paths and assessments

Keahlian

Mobile Development :

- Kotlin
- Jetpack Compose
- MVVM Architecture
- Navigation Component

Backend & Data :

- REST API (Retrofit)
- Room Database
- DataStore

Tools:

- Android Studio
- Git & GitHub
- Figma
- Postman

Project

Cerdikia Mobile App

- Developed quiz-based Android application with gamification features
- Integrated Firebase Authentication (Google Sign-In)
- Implemented REST API for real-time data
- Built UI using Jetpack Compose

Jajanku (UI/UX Design)

- Designed smart expense tracking application
- Created user flow, wireframe, and UI design
- Focused on reducing friction in user input
